

LED NOW IN HEINE QUALITY.

In 1989, HEINE developed the first Hand-Held Dermatoscope, the DELTA 10. Since that time, we continued to lead the market in this field, through optical quality, precision optics and functionality.

### HEINE DELTA®20T Dermatoscope Highest Quality Images and Diagnostic Flexibility

The DELTA 20T offers unrivalled precision optics and the functionality to toggle between polarised and non-polarised illumination for the most accurate diagnosis.

#### LED HQ – High performance LEDs

- No exchange of contact plates necessary
- Digital documentation capabilities
- Adjustable eyepiece
- Toggle function
- High-resolution optics
- Camera ready

All backed by our HEINE 5 year warranty
